

Findings Report

Inspector's Name: Junming Li

Date Started: March 12, 2020

Date Completed: March 13, 2020

Project Name: SaskTech Calendar Application

Time Report:

Time spent on Familiarization with the Code: 1 hour

Time spent on Filling in Findings Report: 2.5 hours

Time spent on Actual Inspection: 3.5 hours

Findings:

#	Description	Line #	file Name	Associated Checklist Item #
1	No brief comment for some getter and setter methods generated by IDE	49 - 111	Event.java	7.b
2	Using lot of annotations without comment	16-43	EventController.java	7.a
3	Using a method inherited from other class without comment	30	EventService.java	7.a
4	No comment for the lack of method body and the connection between mapper class and mapper xml file	12-16	EventMapper.java	7.a
5	Didn't remove some debugging code	23,24,38,39	LoginController.java	9.c

6	The names of these files don't reflect the usage of user sign up	-	LoginMapper.java, LoginController.java, LoginService.java, LoginMapper.xml	7.e
---	--	---	---	-----

Further Comments from the Inspection of these file:

I inspected Shihao' s code, including Event.java, EventController.java, EventMapper.java, EventMapper.xml and EventService.java. All these files are consistent, and they together provide some functions to control event data as a database server. Also, I inspected User.java, LoginController.java, LoginMapper.java, LoginMapper.xml and LoginService.java. Again, all these files are consistent, and they together provide some functions to control user data as a database server.
