Findings Report

Inspector's Name: Josh Koturbash

Date Started: March 12, 2020

Date Completed: March 13, 2020

Project Name:370 project

Time Report:

       Time spent on Familiarization with the Code:0.5 hours

       Time spent on Filling in Findings Report: 1.25 hrs

       Time spent on Actual Inspection: 1.75 hours

Findings:

#	Description	Line #	File Name	Associated Checklist Item #
1	this.setState format is inconsistent, some have semicolons at end some do not	21,29,36,47	addEvent.js	2.a
2	Indentation is inconsistent	55,58,59	addEvent.js	2.b
3	Div class is not intended	94-106	addEvent.js	2.b
4	No comments provided	all	addEvent.js	7a,b,c,d
5	Some commented out lines of code	28,46	addEvent.js	9.c
6	Bracket placement for .catch(err) are different	63,73	myEvents.js	2.a

7	Indentation is inconsistent for array declaration	20-44	myEvents.js	2.b
8	Unnecessary white space	48,72,82,93,102	myEvents.js	2.a
9	Some closing brackets are not intended correctly	78,83,112,119	myEvents.js	2.a
10	Inconsistent variable name for user_id	58	myEvents.js	2.e
11	Constant name should be uppercase	10	myEvents.js	2e
12	No comments provided	all	myEvents.js	7.a.b.c.d

Further Comments from the Inspection of this Class:

I checked Bo Wu's code in the files addEvent.js and myEvents.js for the frontend. The code was generally pretty consistent, clear and concise. There were some minor issues regarding the formatting (looks like different tab space was used in some cases). The biggest issue I observed while inspecting the code was there were no comments. This can be attributed to the fact that most methods are fairly straight forward, with descriptive titles however would be a good idea to include some basic comments for someone not familiar with the project about exactly what each method is doing(ie. getEvent could be expanded to say it is is getting all events for a user from the database)
